RESPONSE TO REQUEST FOR CORRECTED FILING RECEIPT

Claims, Fees, Inventors and Continuity

In response to your request for a corrected Filing Receipt, the Office is unable to comply with your request because:

- ☐ The total number of claims appearing on the Filing Receipt does not include multiple dependent claims. The total fee appearing on the Filing Receipt includes the cost of multiple dependent claims that were present at the time the application was filed.
- ☐ The filing fee is correct. It includes the surcharge under 37 CFR 1.16(e) for filing an oath/declaration or basic filing fee after the application filing date.
- ☐ The inventor information may be truncated if the family name consists of more than 50 characters (letters and spaces combined) and if the given name consists of more than 50 characters (letters and spaces combined). The inventor's residence allows for up to 40 characters (letters and spaces combined).
- ☐ The docket number allows a maximum of 25 characters.
- ☒ Continuity claimed under 35 USC 120 cannot be added to the Filing Receipt without supplying the relationship (i.e. continuation, divisional...).
- ☐ Foreign priority will appear on the Filing Receipt in the following order:
Country, Application number, Filing date.
- ☐ The person signing on behalf of the deceased inventor will be reflected on your Filing Receipt as the legal representative.
- ☐ Only one character per space is allowed. Therefore, punctuation which is usually placed above or below a letter, such as an umlaut (..), cannot be included on the Filing Receipt.

Any corrections that may need to be done to your Filing Receipt should be directed to:

Assistant Commissioner for Patents
Washington, DC 20231

Dear Sir:

Attached is a copy of the official filing receipt from the PTO in the above application for which issuance of a corrected filing receipt is respectfully requested. Applicants also submit herewith a copy of the first page of the specification submitted on December 13, 2001.

Applicants respectfully submit that the priority data set forth on the filing receipt is incomplete. Specifically, the present application is based on, and claims priority from, provisional application serial number 60/221,716, filed July 31, 2000; U.S. utility application serial number 09/895,060, filed June 29, 2001; and Patent Cooperation Treaty application serial number PCT/US01/24017, filed July 30, 2001. This information was correctly set forth on the first page of the specification submitted on December 13, 2001.

The correction is not due to any error by the applicants and no fee is due.

Respectfully submitted,

Karen Dana Oster

FILING RECEIPT

OC000000007360054

Date Mailed: 01/25/2002

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Title

Electrical test probe flexible spring tip

Preliminary Class

439

ELECTRICAL TEST PROBE FLEXIBLE SPRING TIP

The present application is based on, and claims priority from, provisional application serial number 60/221,716, filed July 31, 2000; U.S. utility application serial
5 number 09/895,060, filed June 29, 2001; and Patent Cooperation Treaty application serial number PCT/US01/24017, filed July 30, 2001.

BACKGROUND OF INVENTION

The present invention relates to an electrical test probe tip for use with
10 testing instruments, and more particularly to an electrical test probe flexible coil or spring tip.

An electrical test probe generally consists of a probing head with a tip, a cable, and a connector for attaching the cable to test instruments. The probing head may have an integral or replaceable probing tip that is suitable for making an electrical contact
15 with electrical components. The probing head is attached to a first end of the cable and the test instrument connector is attached to the opposite end of the cable. A means for connecting the probing head to ground is also generally included in the probing head. Ground provides the electrical reference point for other signal measurements, so the ground connection typically remains unchanged while the probing head is moved around
20 to make signal measurements.

Electrical test probes are used to provide an electrical connection between electrical components and testing instruments such as oscilloscopes and other measuring, monitoring, diagnostic, and signal processing instruments. As shown in FIG. 1, a traditional test probe tip is an elongate conductive member that terminates in a conical,
25 blunt, or rounded point.
